VIRTUAL SITE ACCESS

Epic Scan's **Virtual Site Access (VSA)** is the equivalent of a Google street view for your project. It's an intuitive tool that allows unlimited access to your project from any mobile or desktop platform. Verifying site conditions and collaborating with the project team reduces countless site visits. (VSA mobile does not require software installation.)

- ◆ Go to epicscan.com and click the Virtual Site Access.

You will see your project after logging into your VSA page.

Using VSA Mobile:

- ◆ VSA mobile organization:
 - Once you have selected your project, you will see a map either 1) indicating the different areas your project has been broken into or 2) showing the individual VSA locations. This depends on the size of your project.
- ◆ VSA mobile navigation:
 - Bottom right corner provides access to the floor plan, zoom, pan, walkthrough, and full-screen controls.
 - Top right corner provides access to specific locations.

QUESTIONS?

Please contact us if you have any questions or need assistance with your VSA page.
